

NEW MONOBOX SINGLE BOX ROBOT LANDS AT AGRISCOT

The GEA Monobox gives professional dairy producers the greatest advantages in automated milking, accommodating up to 70 cows per box. It also allows for an individualized approach to maximizing your farm's operational efficiency because this exceedingly compact milking station can be seamlessly integrated into your preferred housing design with minimal building work.

In addition to premium quality milk, the Monobox ensures outstanding teat

cleaning, an optimal milk harvest process, and a stall designed for comfort to keep every cow in the herd healthy, productive and profitable.

VISIT US AT AGRISCOT ON STAND 113 (NEXT TO SHOWING RING)

NEW GEA AGRICULTURAL EQUIPMENT CATALOGUE RELEASED

A snapshot of what you can expect to find in the new 2016 GEA Agricultural Equipment catalogue:

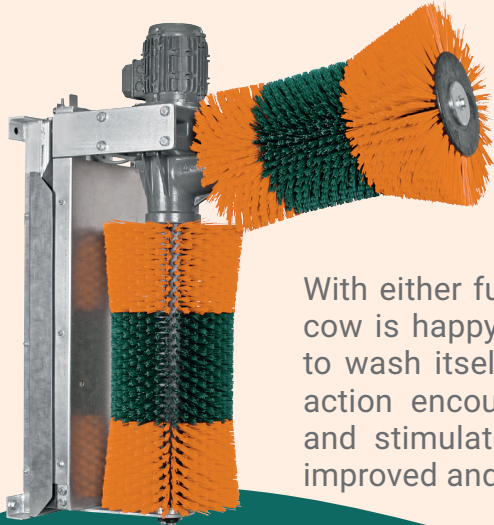

If you haven't received your copy yet contact **Jamie Lindsay** on 07714772330 or collect on our stand at Agriscot.

For cows a simple rule applies:

'The more the animal feels, the more you can earn with it.'

Happy Cow Double Duo Brush

Happy Cow Swing Brush

With either fully automatic HAPPYCOW brush, the cow is happy, willing and fully independently able to wash itself. The large brushes and massaging action encourages better circulation in the skin and stimulates metabolism. Milk output can be improved and the general wellbeing of the cow!

IPCam 360° HD

IPCam - incredibly easy installation thanks to "plug & view": Simply connect the camera to the network, scan the QR code with a smartphone or tablet and activate the camera on your smartphone, tablet or PC. Suitable for use in networks or the internet. Internet access via cable or wireless is essential! This means you can enjoy live images in under a minute.
